

# Addax Mining Explorer Kitbag

*“The software solution designed specifically for Western Australian exploration companies”*

## EXPLORATION SOLUTION

The explorer kitbag includes templates for Tenement Management, GL structures, Financial Management, reporting and data input.

## COMPREHENSIVE REPORTING

Excellent reporting and analysis capabilities for complex statutory and management requirements.

## AMOS - ADDAX MINING OPERATIONS SOLUTION

The Explorer Kitbag can be expanded easily into AMOS, which comprises multi-company and multi currency consolidation for more complex business setups. From payroll to tenement management, the solution design is modular and fully integrated, which gives you the flexibility to add additional functionality as your business grows.

Addax's Mining Explorer Kitbag has all the ingredients to manage the costs and operational budgets of mining explorers. The Kitbag is comprised of four key components:

- Greentree Business Software
- Software Implementation
- Employee Training
- Ongoing Support

Each component of the Explorer Kitbag solution has been specifically designed to cater to the unique needs of West Australian mining exploration companies.

## Business Software

The explorer kitbag contains four user licences for each of the following fully integrated Greentree Business Software modules:

- Addax Tenement Management
- Accounts Payable
- General Ledger
- Cash Management
- Transaction Analysis
- Workflow
- Reporting (Form5)

## Software Implementation

Years of experience in mining software implementation allows Addax to go beyond the understanding that your business is unique and discover the best way to implement a solution for your organisation.

Under the direction of our experienced consultants and project managers, Addax will work with you to implement a system truly aligned with your business goals, and with minimal disruption to your organisation.

## Employee Training

Addax understands the unique requirements of mining operations - from exploration to construction and full production. We can train your employees to use the software included in the Explorer Kitbag to the full advantage of your organisation.

Working in a remote location? No problem. Addax currently works with mining operations in locations such as Botswana, Papua New Guinea, Finland and remote Australia .

## Ongoing Support

The Explorer Kitbag solution includes a twelve month support services agreement for all kitbag modules. As a customer of Addax Business Solutions, you will receive nationwide access to mining software experts with direct connections to the software authors.

With offices in Perth and Sydney, Addax provides local and international companies with comprehensive business solutions including Business Consulting, Project Management, Implementation, Training and IT Support.
