

Financial Report Generator - FRG

The Fast Way To Produce Greentree Reports

REDUCE CONSULTING TIME AND COST

Dramatically reduce the number of consulting hours required to build reports.

ELIMINATE ERRORS

With the one click reports are updated with any new accounts added to your Greentree system.

IMPROVE BUSINESS TRANSPARENCY

Templates for a range of "standard" reports, and the ability to create additional templates based on your own reporting requirements.

FULLY INTEGRATED

Excel, FREE, and Greentree integration for a seamless upgrade from your current reporting method.

For more information on FRG or other "by Addax" products, contact your local Greentree reseller or visit Addax online: www.AddaxSolutions.com

Introducing the ultimate time-saving tool for generating new Financial Reports utilising Greentree's Excel add-in functionality.

Whether you undertake the task yourself or outsource to your local Greentree reseller, the initial design of Profit and Loss (P&L) and Balance Sheet report layouts is a time-consuming exercise, often taking up to 10 hours to complete. Add to this the ongoing aggravation of having to manually update reports each time a new General Ledger account is added.

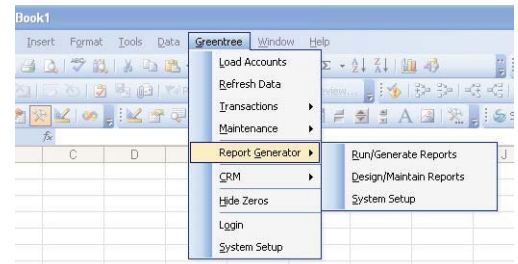

The Financial Report Generator eliminates much of this manual effort and frustration. Hours of template creation and maintenance is replaced with a single button push and a few minutes of processing for each report.

	Without FRG	With FRG
	GT Tree	GT Tree
	+	+
	Add Excel 'GT' Functions	Column Template Library
	+	+
	Elbow Grease	One Button Push
	=	=
	Balance Sheet P&L	Balance Sheet P&L
<hr/>		
	New Accounts added...	
	Even more effort	One button push

Save Time & Money

FRG combines an Excel column template with your own Greentree General Ledger master file tree to produce a report that is comparable to one that has been manually defined using Greentree's FREE formulae.

So what's the difference? With FRG you can say *goodbye to the effort*. FRG generates P&L and Balance Sheet reports from your Greentree system at the click of a button - literally!

Library of Templates

Each column layout template contains the intended column structure of the report. The row structure as well as subtotal nesting is implied by one or more General Ledger master file trees in Greentree. Templates are in Excel workbook format and can be edited and easily personalised. In addition, new templates can easily be created in order to provide the right look and content for each report.

Easily Add New Accounts

FRG reports can be re-generated at will, ensuring that as new accounts are added to the General Ledger in Greentree, the Excel based report is kept updated.

A Great Investment

Your initial investment is \$1500 + GST per site. An annual maintenance fee (currently 17.5%) will cover software version updates to keep abreast of platform changes (Greentree, Excel or Windows) and deliver full access to new column templates as they are released.
